* Write your name below on the space provided.
* This test has a total of 5 pages.
* Work the problem in the space provided. If you need more space, write on the back of the test.
* For some credit, draw a snowman on this page.
* To insure maximum credit, show your work. In general, full credit will not be given for unsupported answers.
* Look only at your test. Don't give me the impression that you are cheating.
* Be sure to write neatly. If I cannot read what was written, do not expect the problem to be graded.
* If you finish early, go over the test again.

## Good luck!

| Number | Maximum |  |
| :---: | :---: | :---: |
| 1 | 3 | Score |
| 2 | 3 |  |
| 3 | 20 |  |
| 4 | 12 |  |
| 5 | 3 |  |
| 6 | 6 |  |
| 7 | 4 |  |
| 8 | 15 |  |
| 9 | 8 |  |
| 10 | 5 |  |
| 11 | 6 |  |
| 12 | 4 |  |
| 13 | 4 |  |
| 14 | 3 |  |
| 15 | 100 |  |
| 16 |  |  |
| Total |  |  |

Name $\qquad$

1) (3 points) Write the first 12 counting numbers (starting with 1 ) in base 5 . You do not have to write the subscript:
2) (3 points) Count from $52 D_{\text {sixteen }}$ to $532_{\text {sixteen }}$. You do not have to write the sixteen each time:
3) (5 points $a, b ; 10$ points $c$ ) Convert the following numbers to the given base:
4) Convert the following numbers to the given base:
a) $514_{\text {seven }}$ to base 10
b) 2,330 to base 8
c) $1412_{s i x}$ to base 9
5) (3 points each) Label the following as either true or false. Use the word "true" or "false" to mark your answer. If false, explain why or give a counter-example:
a) $7 \mid 14$ $\qquad$ b) $8 \mid 4$ $\qquad$
c) If 2 divides into a number and 6 divides into the same number, then 12 also
d) If 12 divides into a number, then both 2 and 6 must also divide into that number.
6) (3 points) List the first 10 prime numbers:
7) (3 points each) Write the prime factorization for the following numbers:
a) 108
b) 350
8) (3 points) What is the divisibility test for...
a) 6 ?
b) 9 ?
9) (5 points each) Label the following numbers as perfect, abundant, or deficient. Be sure to show supportive work:
a) 6
b) 17
c) 24
10) (4 points each) A Harshad Number is a positive integer which is divisible by the sum of its digits. For example, the number 18 has digits 1 and 8 whose sum is 9 . Note that $9 \mid 18$. Determine if the following numbers are Harshad Numbers. Be sure to show supportive work:
a) 24
b) 37
11) (5 points) Patrick needs to order a total of 46 SpongeBob hats for his math class. The hats are only sold in packs of 3,7 , and 11 . How many of each pack would he need to get a total of 46 hats?
12) (6 points) For the numbers 126 and 140 , find the GCF and the LCM using your favorite method. Be sure to label your answers:
13) (4 points) Using your work above, fill in the Venn Diagram for the numbers 126 and 140:

14) (4 points) SpongeBob, Patrick, and Sandy work at the Krusty Krab to check Krabby Patties for freshness. SpongeBob checks every $12^{\text {th }}$ patty, Patrick checks every $8^{\text {th }}$ patty, and Sandy checks every $21^{\text {st }}$ patty. What will be the first patty checked by all three?
15) (4 points) Given that the first two terms of the Fibonacci Sequence are 1 and 1, write the next 6 terms and also explain how you find them (i.e. explain the process of getting the next terms):
16) (3 points) List two things you learned about the Golden Ratio while watching Donald Duck in Mathmagic Land.
